PRIUS

All the power you need

From the beginning, we decided to meet any dosing needs, even the most extreme. Exactly from this idea originates the series of motor driven pumps PRIUS, entirely designed and developed by EMEC to comply with any need of a higher dosage, with a range of 12 models.

POWER AND ACCURACY

The series of motors available for the PRIUS allows a wide range of flow rates, from a few liters up to over 1000 liters per hour, and a working pressure which can reach up to 100 bar, while maintaining at the same time, thanks to the quality of design and construction gained by EMEC in 34 years of research and development, the steady and absolute accuracy in dosage distinguishing of all our products.

RESISTANCE AND SAFETY

To succeed in combining power and accuracy in every situation of use is also possible thanks to a high degree of resistance and versatility. The possibility to choose between models with PTFE diaphragm and models with ceramic or SS plunger, together with liquid ends available in different materials and sizes to choose, makes motor driven pumps PRIUS able to meet any need of use and to result safe and resistant according to the nature of the substance to dose: from very viscous liquids to particularly aggressive chemical agents, from acidic solutions to basic, up to solvents and polymers.

CONTROL AND MANAGEMENT

Mechanical regulation of desired flow rate of PRIUS pumps is possible thanks to the specific knob. However, for higher management needs, EMEC also created the revolutionary series of multifunction motor driven pumps PRIUS MF. A completely new level of accuracy in dosing control and regulation is ensured by the encoder electronic control, already used successfully in all our control

instruments, the LCD display, permitting an easy and precise reading of all the data, and above all by the possibility to set up PRIUS MF with 7 different working modes. The maximum level of control is also ensured by the integration with our exclusive remote management system ERMES, that allows monitoring of the PRIUS MF pumps from everywhere and in every moment. Furthermore, through the Modbus (RS485) electronic module you can combine MF pumps with other instruments and manage everything through PLC (Programmable Logic Controller).

RELIABILITY AND EFFICIENCY

The great resistance and strength of PRIUS motor driven pumps ensure a high degree of efficiency and reliability, constant over time, with minimal servicing needs and a particularly long operating life. Lastly, PRIUS MF can comply with any situation by rotating the pump body by 90° over the electronic unit. The top qualities of power and accuracy in dosing, combined with the great reliability and the great versatility of the available models, make the motor driven pumps of PRIUS series suitable for a wide range of applications: from potable water facilities to treatment of water resulting from industrial activities, in purification systems and in food industry as well as in chemical industry. Wherever a top-level dosing system is required, PRIUS is the best answer.

FEATURES

- Multifunction motor pump with inverter
- Working mode: Constant, ppm, %, mlq, pause-work, weekly, mA, Volt and Batch
- Level control
- Alarms
- Stand-by
- Double position of the electronic unit (default or alternative gear box position)
- PTFE diaphragm
- Aluminium enclosure
- Spring return mechanism
- Manual degassing valve (PVDF and PP pump heads)
- Stroke adjustment
- Liquid ends available in different sizes and materials
- Double ball check valve

PRIUS D MF 50/60 Hz 1-PHASE *Multifunction electronic control*

MOTOR

0,37 kW: 3-phase 230 V 1370 rpm

PRIUS D MF 50/60 Hz with SINGLE-PHASE supply has: 10 working modes (constant, ppm, %, mlq, pause-work, weekly, pulse, mA, Volt and Batch), level control, alarms, stand-by, double position of the electronic unit (standard or alternative gear box mounting), PTFE diaphragm, aluminium enclosure, spring return mechanism, manual degassing valve (PVDF and PP pump heads), flow regulation, double ball check valve and liquid ends available in different sizes and materials. PVDF, Stainless Steel or PP pump heads available.

Multifunction motor pump PRIUS D MF 50/60 Hz SINGLE-PHASE brings, moreover, a unique level of management thanks to LCD display and encoder electronic controller that ensure the highest accuracy in dosage setting.

OPTIONS: MODBUS, IP65 Motor.

DEFAULT GEAR BOX POSITION

ALTERNATIVE GEAR BOX POSITION

FEATURES

- Multifunction motor driven high pressure pump with inverter
- Working mode: Constant, ppm, %, mlq, pause-work, weekly, mA, Volt and Batch
- Level control
- Alarms
- Stand-by
- Double position of the electronic unit (default or alternative gear box position)
- PTFE diaphragm
- Aluminium enclosure
- Spring return mechanism
- Stroke adjustment
- Double ball check valve

Plunger Pumps

44/45

PRIUS P ATEX 2D/2G 50 Hz 3-PHASE

CATEGORY 2

Installation areas liable to be endangered by explosive atmospheres.

Pumps intended for use in areas in which explosive atmospheres are likely to occur.

	G (gas)	D (dust)
199/92/EC	Zone 1	Zone 21

ATEX-approved pumps are for use in **potentially explosive atmospheres**.

Explosive atmospheres consists of air and combustible matter, such as gases, vapours, mists or dusts in which the explosion spreads after ignition.

We offer explosion-proof or dust-ignition-proof motors in accordance with the ATEX directive **2014/34/UE**.

ATEX-approved pumps can be used in areas (zones) classified according to the directive 1999/92/EC.

PRIUS P with 3-PHASE motor and ATEX certification has: SS plunger, aluminium enclosure, flow regulation and double ball check valve.

FEATURES

- Ceramic plunger
- Aluminium enclosure
- Spring return mechanism
- Double ball check valve
- 3-phase motor

A. INSTALLATION KIT

Included without extraprize

- 1/2" foot filter with 13 mm (int. diam.) hose fitting
- 3/4" injection valve
- PVDF delivery hose (13X16 PVDF or 12x18 PVC)
- PVDF suction hose (13X16 PVDF or 12x18 PVC)

B. INSTALLATION KIT

- 1 1/2" foot filter with 18 mm (int. diam.)
- hose fitting (G1 1/2" - 18 mm)
- Suction hose - 18x25 PE
- Delivery hose - 18x22 PVDF

C. INSTALLATION KIT

- 1 1/2" foot filter with 32 mm (int. diam.)
- hose fitting (G1 1/2" - 32 mm)
- 1 1/2" injection valve
- Suction hose - 32x40 PVC (spiral hose)
- Delivery hose - 32x42 PVC (meshed)

ACCESSORIES

PRESSURE / SECURITY VALVE

The pressure/security valve, directly controlled by the medium, is used in technical processing plants to keep constant working pressures on the primary side. The pressure/security valve can also be used as an overflow valve to prevent pressure peaks. In this case, the pressure/security valve is fitted in a bypass line.

Operating Pressure: 0,5-10 bar
Opening Pressure: 0,3 bar

PULSATION DAMPENERS SOIM2.5 - SOIM5

PVC pulsation damper without membrane.
FKM B o-ring.
Available in 2,5 liter (SIOM2.5)
and 5 liter (SOIM5).
